PROFESSIONAL SUMMARY

Software Development Engineer specializing in **backend systems, automation, and AI-native developer tooling**. Strong problem-solving background with **LeetCode Guardian 2145, CodeChef 4-Star 1919, and 800+ DSA problems solved**. Experienced in building production-oriented systems using **Go, TypeScript, Node.js, REST APIs, Docker, GitHub Actions, AWS EC2, PostgreSQL, MongoDB, Redis, and Workato**, with a focus on API integrations, reliability, auditability, structured logging, and scalable backend design.

EDUCATION

Thapar Institute of Engineering and Technology <i>B.E. in Computer Science and Engineering</i> CGPA: 8.2/10	Patiala, Punjab 2022 – 2026
--	--------------------------------

EXPERIENCE

Software Engineering Intern – Backend Integrations <i>Adaptware Solutions Pvt Ltd.</i>	Mar 2026 – Present
– Developed and maintained 50+ backend integration workflows across CRM APIs, Twilio, webhooks, and email systems, improving lead communication reliability and reducing manual operational effort. – Developed event-driven flows for lead communication, notifications, and data synchronization, reducing manual effort and improving process reliability. – Debugged execution failures, optimized payload handling, and improved error tracking to ensure more reliable workflow execution and faster issue resolution.	

PROJECTS

AE Brand User Invitation System <i>Go, REST APIs, Docker, OpenAPI, GitHub Actions</i>	GitHub 2026
– Built a production-ready Go backend service for brand user invitation and self-service onboarding, supporting 6+ user-management operations including creation, persona updates, removals, listing, and audit queries. – Implemented super-admin authorization, request validation, duplicate-user handling, multi-persona support, audit logging, Docker setup, OpenAPI docs, GitHub Actions CI, and unit tests.	
DevSquad MCP <i>MCP Server, TypeScript, Node.js, npm, Workflow Orchestration</i>	GitHub 2026
– Published an NPM-based MCP server that converts vague coding prompts into structured workflows for 4 AI coding agents: Claude Code, Codex, Cursor, and Antigravity. – Built a prompt classification engine with 3 execution paths and rule-based review gates to reduce unsafe changes across authentication, payments, databases, deployments, and secrets.	
Smart Expense Splitter <i>Next.js, TypeScript, PostgreSQL (Neon), NextAuth, Docker</i>	GitHub 2026
– Engineered a full-stack expense management platform supporting 4 split modes: Equal, Exact, Percentage, and Itemized splits with precise financial workflows. – Validated a penny-accurate settlement system across 1000+ generated expense cases and implemented a greedy settlement algorithm to minimize transactions across complex group scenarios.	

TECHNICAL SKILLS

Languages: C++, Go, TypeScript, JavaScript, SQL
Backend & Systems: Go HTTP Services, Node.js, RESTful APIs, API Integrations, Webhooks, Workato, Redis
Cloud & DevOps: Docker, GitHub Actions, AWS EC2, AWS S3, Nginx, Git, GitHub, CI/CD, Unit Testing
Frontend: Next.js, Tailwind CSS
Problem Solving: LeetCode **2145**, CodeChef 4-Star **1919**, 800+ DSA Problems
Core CS: Data Structures and Algorithms, Operating Systems, DBMS, Computer Networks, Object-Oriented Programming

ACHIEVEMENTS

INR 3 Lakh Merit Scholarship awarded by Thapar University for academic excellence.
Secured **Global Rank 25** in CodeChef Starters 216.
Secured **Global Rank 181** in LeetCode Biweekly Contest 173.
