LeetCode: [abhaybansal_](https://leetcode.com/abhaybansal_) (Guardian) | CodeChef: [bansal03](https://www.codechef.com/users/bansal03) (4★)

SUMMARY

Backend-focused Software Engineer with hands-on experience building scalable microservices and AI workflow infrastructure using **TypeScript**, **Node.js**, **Go**, PostgreSQL, Redis, and LangGraph. Strong competitive programmer: **LeetCode 2140+ (Guardian, top 1% globally)** and **CodeChef 4-Star (1916+)**, with 800+ DSA problems solved and multiple global top-200 contest finishes. Passionate about distributed systems, agentic AI tooling, and writing clean, efficient, production-ready code.

TECHNICAL SKILLS

- **Languages:** C++, Go, TypeScript, JavaScript, SQL
- **Backend:** Node.js, Fastify, REST APIs, Socket.IO/WebSockets, JWT Authentication, OpenAPI, LangGraph
- **Frontend:** React, Next.js
- **Databases:** PostgreSQL, Redis
- **DevOps & Tools:** Docker, GitHub Actions (CI/CD), AWS (EC2, S3), Git, Linux, Postman
- **Testing:** Unit Testing, Integration Testing, Go testing
- **Core CS:** Data Structures and Algorithms, Operating Systems, DBMS, Computer Networks, OOP

EDUCATION

- **Thapar Institute of Engineering and Technology** Patiala, Punjab
B.E. in Computer Science and Engineering; CGPA: 8.4/10 2022 - Jun 2026

EXPERIENCE

- **Adaptware Solutions Pvt Ltd.** Chandigarh, India
Software Engineering Intern Mar 2026 - Jul 2026
 - **Microservices Architecture:** Contributed to a monorepo-based microservices platform spanning 2 independently deployable Fastify services, separate PostgreSQL schemas, Redis-backed workers, React applications, and shared npm packages for recruiting and AI workflow systems.
 - **Backend Integration:** Engineered a centralized TypeScript integration layer between the product backend and Orion AI service, enabling 20+ AI workflows across 12+ modules including resume processing, job creation, candidate screening, assessments, and interviews.
 - **Real-Time Workflow Execution:** Built Socket.IO-based workflow communication with JWT auto-refresh, request correlation, connection reuse, timeout handling, and concurrency throttling, supporting up to 50 parallel AI executions per backend instance.
 - **Conversational AI Workflows:** Implemented multi-turn workflow execution using LangGraph checkpoints, Redis, thread identifiers, and persisted execution IDs, preserving state across 5+ conversational flows such as job intake, resume building, and application screening.
 - **Live Interview Analysis:** Integrated recruiter-assist workflows that performed sentiment analysis every 30 seconds and live interview analysis every 2 minutes, persisted insights to PostgreSQL, and streamed results to interviewers through Socket.IO.

PROJECTS

- **AE Brand User Invitation System:** Built a production-ready Go backend service for brand user invitation and self-service onboarding, supporting 6+ user-management operations. Implemented authorization, request validation, duplicate-user handling, multi-persona support, audit logging, Docker, OpenAPI docs, CI pipelines, and unit tests.
Tech: Go, REST APIs, Docker, OpenAPI, GitHub Actions
Github: github.com/abhaybansal0322/AE-Brand-User-Invitation
- **DevSquad MCP:** Published an NPM-based MCP server that converts vague coding prompts into structured workflows for 4 AI coding agents. Built a prompt classification engine with 3 execution paths and rule-based review gates for safer AI-assisted changes across authentication, payments, databases, deployments, and secrets.
Tech: MCP Server, TypeScript, Node.js, npm, AI Agents
Github: github.com/abhaybansal0322/Devsquad
- **Smart Expense Splitter:** Engineered a full-stack financial workflow platform supporting 4 split modes: Equal, Exact, Percentage, and Itemized splits with precise settlement logic. Validated a penny-accurate settlement system across 1000+ generated expense cases and implemented a greedy algorithm to minimize group transactions.
Tech: Next.js, TypeScript, PostgreSQL, NextAuth, Docker
Github: github.com/abhaybansal0322/smart-expense-splitter

ACHIEVEMENTS

- **Secured Global Rank 136 and 176 in LeetCode Weekly Contests:**
Ranked in the top 1% among 30,000+ participants in global rated LeetCode programming contests.
- **Secured Global Rank 25 in CodeChef Starters 216 Division 2:**
Ranked among the top performers out of 20,000+ Division 2 participants in a global rated CodeChef contest.
- **Awarded INR 3 Lakh Merit Scholarship by Thapar University:**
Recognized for academic excellence during undergraduate studies.
